paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 158 Language: Simplified Chinese Publisher: Xiamen University Press; 1st edition (March 1. 2009). Programmable logic controller (PLC) Experimental Course tells the story: Now, with the 212 industry control technologies, programmable logic controller has been widely used in the field of automatic control of industrial processes, making the degree of automation and production efficiency of the 212 industry has been greatly improved. Order to adapt to the needs of the community, tertiary institutions, professional automation, electrical and electronic applications expertise, mechatronics professional has opened a programmable logic controller, Principles and Applications course, and more choice to the Programmable Logic Controller system hardware and software design for the content of the curriculum design and graduate design, and strive to make students learn in school as soon as possible to master this advanced technology can achieve a higher starting point and the level after graduation. The application of the programmable logic controller technology is a very practical subject, practice is essential, the actual operation is only by doing experiments, school to school through a programmable logic controller technology. In order to meet the needs of the experimental teaching, promoting the teaching quality, prepared this study guide book. Book of experimental content arrangements in line with the principle of gradual and progressive approach to the overall consideration, the order in accordance with the basic instructions and application instructions in the instruction set of the programmable logic controller. The purpose of the use of laboratory equipment for the students to create an environment close to the practical application of engineering and the opportunity to take on the project. Experiments, according to the conditions of the proposed 212-Arts, the preparation of the...
